Summary

Full Stack Web Developer with a background in implementing tax provision software. Recognized for effective communication and creative problem-solving skills.

Technical Skills

Languages: Fluent Spanish, HTML5, CSS3, JavaScript, Bootstrap, Git, jQuery, Node.js

Projects

Pizza by the Byte | <https://github.com/garizpe9/PizzabytheByte> | <https://garizpe9.github.io/PizzabytheByte/>

- Web Application that uses Google Maps API and Yelp API to pinpoint nearest mapped pizza places and creates a table of the restaurant names, ratings, and price points.
- Core responsibilities were finding a CORS API and using jQuery to create a table from the Yelp API, managing the timeline and responsibilities of overall project
- Languages: HTML5, CSS3, jQuery

Weather Dashboard | <https://github.com/garizpe9/WeatherDash> | <https://garizpe9.github.io/WeatherDash/>

- Web Application using two Openweathermap APIs to find current and forecasted weather information and images for corresponding weather for selected city. Each search is stored in a div and in local storage and can be clicked on to trigger a weather search.
- Core responsibilities using Bootstrap, CSS3, and HTML5 for the website structure and using jQuery to create the weather dashboard
- Languages: HTML5, CSS3, Bootstrap, jQuery

Random Password Generator | <https://github.com/garizpe9/passgen> | <https://garizpe9.github.io/passgen/>

- Web Application using JavaScript to alert password specification and create a random generated password on website.
- Core responsibilities were creating JavaScript to run password generator
- Languages: HTML5, CSS3, JavaScript
